

October 2017

On Monday Astrid, Julisa and I met Kathy at the airport. We then headed to a nearby store and purchased four grocery carts full of food and supplies for the House of God in Guatemala City. A wonderful couple with hearts of gold, Lionel and Maritza provide this home for children and their parents to stay in while they are in the city for cancer treatments. We gave each child a toy and candy while the parents received a comfort quilt. There were kids ages 3-18 with leukemia and tumors of the brain, eye, foot and lungs.

Despite their limitations and difficulties they were all smiles and gave us hugs and were so happy to see us. If not for the House of God these kids would have no place to stay. Lionel and Maritza are God's angels. My heart breaks every time that I visit there just seeing how much the children suffer and knowing, most likely, the same children will not be alive the next time.
